

No Dice — Golf Course Operations Risk Assessment

Site: No Dice, Arch 407, Mentmore Terrace, London Fields, London E8 3PH — 9-hole crazy golf course

Operating company	No Dice Hackney Ltd
Written by	Elliot Scott
Document date	15/06/2026
Review due	15/06/2027 (or sooner if the course or operation changes)

General notes on the golf operation

The venue operates a themed **9-hole crazy golf course** adjoining the bar. Play is in booked tee-time groups; players are issued a putter, ball and scorecard at the start of their round and equipment is returned at the end. The course consists of artificial putting surfaces with themed obstacles and features. Alcohol from the bar may be consumed while playing, which is factored into supervision and admission decisions. This risk assessment covers the golf function of the venue; separate risk assessments exist for the bar and kitchen.

Risk assessment method

Severity (S) — judged by evaluating the effects of the hazard if the risk occurs: Minor = 1, Major = 2, Serious = 3.

Likelihood (L) — the likelihood of the harm occurring: Unlikely = 1, Possible = 2, Likely = 3.

Overall risk — Severity (S) × Likelihood (L): **1–3 Low, 4–6 Medium, 7–9 High**.

S × L	Unlikely (1)	Possible (2)	Likely (3)
Minor (1)	1 Low	2 Low	3 Low
Major (2)	2 Low	4 Medium	6 Medium
Serious (3)	3 Low	6 Medium	9 High

HAZARD	WHO IS AT RISK	WHAT ACTION IS TAKEN NOW	RATE OF RISK	WHAT FURTHER ACTION CAN BE TAKEN
--------	----------------	--------------------------	--------------	----------------------------------

Being struck by a club — swinging putters	Customers and staff	• Putters only — no full-swing clubs are issued or permitted; players are briefed to keep swings low (putting strokes only). • Course rules displayed at the first tee and on scorecards: one group per hole, stand behind the player taking their shot. • Group sizes are capped at booking, and tee times are spaced so groups do not bunch on holes. • Staff monitor the course during service and intervene where play is careless; putters are withdrawn from anyone swinging dangerously. • Equipment is issued and returned at the desk, so putters do not circulate in the bar area.	S = 2 · L = 2 S × L = 4 Medium	Course-rules briefing wording reviewed seasonally; add signage at any hole where incidents recur.
Being struck by a golf ball	Customers and staff	• Low-bounce course balls are used; putting-pace play only. • One group per hole; players wait for the hole ahead to clear before teeing off. • Course layout keeps tee-off directions away from walkways and seating where practicable. • Stray balls are retrieved by staff where they leave the course area.	S = 1 · L = 2 S × L = 2 Low	None beyond periodic layout review.
Slips, trips and falls — course surfaces, obstacles and edging	Customers and staff	• Course walked and visually checked before opening each day: surfaces flat and secure, obstacles fixed, edging and trim intact. • Any damaged surface, loose feature or trip point is reported and the hole is closed until it is made safe. • Spillages of drinks on the course are cleaned immediately; glassware is discouraged on the course itself. • Appropriate lighting across the course and walkways during operating hours. • Themed obstacles are secured so they cannot topple or be moved by players.	S = 1 · L = 2 S × L = 2 Low	Log the daily course walk-round in the ops checklist so it is a recorded check.
Intoxicated players	Customers and staff	• Bar staff follow the legal requirement not to serve customers who are intoxicated; the same judgement applies to admitting players onto the course. • Staff and security may refuse course entry to, or remove, anyone whose behaviour is unsafe; refusals are recorded in the incident logbook. • Trained security personnel are on site during all operating hours. • CCTV covers the venue, recorded and stored for 30 days.	S = 2 · L = 2 S × L = 4 Medium	Any incidents promptly investigated; course-entry policy reviewed if issues recur.

Children on the course	Customers (children)	- Children must be accompanied and supervised by an adult in their group at all times. - Child-length putters issued where appropriate. - Course obstacles are secured and have no accessible moving parts.	$S = 2 \cdot L = 1$ $S \times L = 2$ Low	State the supervision requirement on the booking confirmation and at the desk.
Manual handling — course maintenance and equipment	Staff	- Course features and obstacles are moved only by staff, two-person lift where heavy. - Putter and ball stock stored at waist height at the issue desk. - Significant course works are carried out by contractors.	$S = 2 \cdot L = 1$ $S \times L = 2$ Low	None.
Damaged or defective equipment	Customers	- Putters and balls inspected on return; damaged equipment is taken out of circulation. - Course fixtures inspected on the daily walk-round; defects reported and repaired promptly.	$S = 1 \cdot L = 1$ $S \times L = 1$ Low	None.
Fire and evacuation from the course area	Customers and staff	- The course is covered by the venue's fire alarm and evacuation procedures — see the No Dice Fire and Emergency Evacuation Plan. - On the alarm, staff clear the course along with all other areas and direct players to the assembly point (London Fields park, by the pétanque course). - Escape routes from the course area are kept clear; checked as part of daily fire-exit checks.	$S = 3 \cdot L = 1$ $S \times L = 3$ Low	Include the course sweep explicitly in fire-drill briefings.
Electricity — course lighting and themed features	Customers and staff	- Course lighting and any powered features are installed by qualified electricians; wiring checked five-yearly and PAT testing annually. - Cabling is routed away from playing surfaces and walkways or protected by covers. - Staff trained to take damaged equipment out of service.	$S = 3 \cdot L = 1$ $S \times L = 3$ Low	None.
